

ING Joins Mailers Technical Advisory Council

The Board of Trustees is pleased to announce ING has been accepted as a member of the USPS Mailers Technical Advisory Council (MTAC). The Postmaster General's Mailers Technical Advisory Committee (MTAC) is a venue for the United States Postal Service to share technical information with mailers, and to receive their advice and recommendations on matters concerning mail-related products and services, in order to enhance customer value and expand the use of these products and services for the mutual benefit of mailing industry stakeholders and the Postal Service.

As a member of MTAC, ING is a part of a network of mailing industry professionals who work collectively with postal leadership to help advance the value of mail. We will have the opportunity to work hand-in-hand to solve pressing issues in the industry. The work helps drive technological innovations, and new and improved mail processes.

Kim Waltz, Vice President, Client Relations & Postal Affairs at Cathedral Corporation, will serve as the Association Representative for ING. We thank Kim and Cathedral Corporation for their service to ING for not only this prestigious organization, but also for Kim's work inside of C21 (Coalition for a 21st Century Postal Service) on behalf of ING's members.

Kim will be providing updates going forward, as well as, speaking to the group at ING's Fall Meeting in October. Also, look for more information to include open MTAC ING representative positions to participate in work groups, focus groups, or user groups, to help shape the future of the mailing industry and address the needs of ING members.
